## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed May 15, 2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

No copy of references JP 07249824, DE 10108079, DE 10026734 has been received.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 11, 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Clayton (2002/0075935).

Regarding claims 1, 2, 11,

Figure 6 illustrates a surface emitting vertical emission region (80), an integrated pump source (40) arranged to pump the vertical emission region in the form of bundles of rays with different directions. Paragraph [0036] discloses the pump source providing pumping light to the vertical emission region to obtain single transverse mode, which implies fundamental mode.

Regarding claim 3, 4,

Paragraph [0032] discloses the pump source including reflective mirrors (Bragg reflectors), which will form a closed resonator and implies semiconductor lasers.

Regarding claim 5, 12,

Figure 6 illustrates curved cavity end facets (44a, 44b).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Clayton (2002/0075935).

Figure 7 illustrates a ring laser.

Therefore, it would have been obvious to a person of ordinary skill in the art to arrange the laser in different configurations as illustrated by Clayton.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Spath et al (US 6,947,460).

Regarding claims 13-15,

Figure 9 illustrates a vertical emitter (20), a semiconductor pump source (140) having a ring configuration, including strip lasers (30) and at least three inner cavity facets for total internal reflection. Column 9 lines 51-54 discloses circulating modes, which implies the fundamental mode.

#### ***Allowable Subject Matter***

Claims 6-10, 16, 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
